

MA'S TOOLS

Update Enhanced gives choice to your updates of Fantasy Grounds Unity.

VERIFY INSTALLATION

1. From inside the Fantasy Grounds Unity directory launch FGUpdaterEngine.exe
2. Compare the launched updater to that on the right. Specifically it should have a cyan colored button that says "Update..."
3. If the correct button appears, you can press "Update..." to begin the process of selecting products to update.
4. Once the button is pressed, Update Enhanced will check online for the latest products and compare them to the copy already installed.
5. Once compared, a new window will appear.

LICENSE INSTALLATION

1. Once you verify the installation above, obtain a license at:
<https://forge.fantasygrounds.com/shop/items/944/view>
2. Support is available at:
Forum -- <https://www.fantasygrounds.com/forums/showthread.php?82995>
Discord- <https://discord.com/channels/248168089407979530/952766902499958824>

INITIAL COMPARISON WINDOW

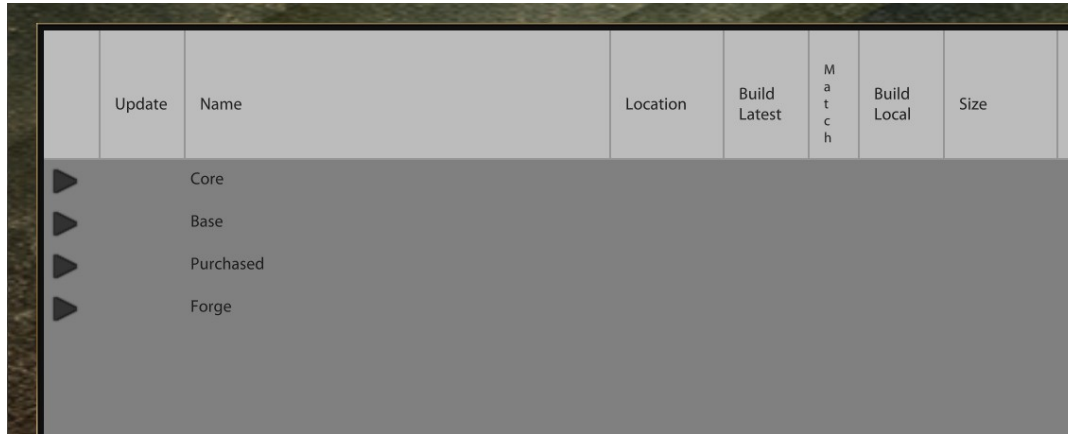

The comparison window contains seven columns:

1. Update
2. Name
3. Location
4. Build Latest
5. Match
6. Build Local
7. Size

and four row sections:

1. Core
2. Base
3. Purchased
4. Forge

Along the bottom are two buttons; **Update** and **Cancel**.

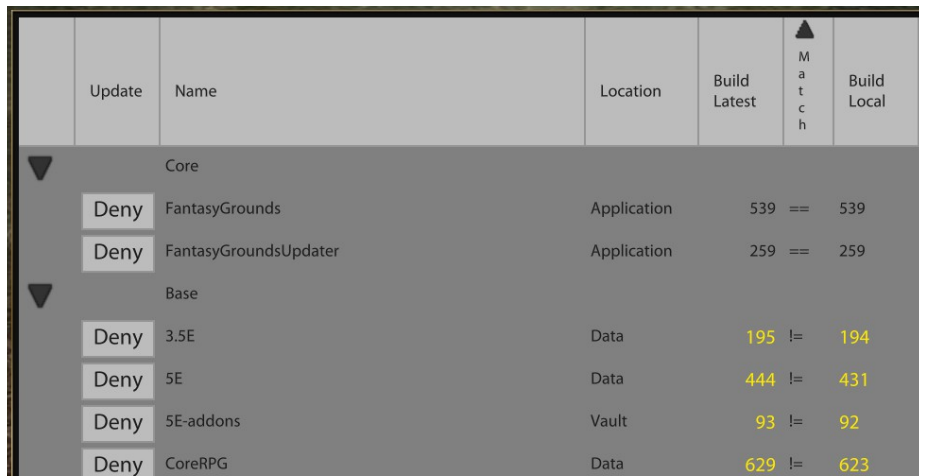

A screenshot of the initial comparison window. It features a table with seven columns: Update, Name, Location, Build Latest, Match, Build Local, and Size. The table is divided into four sections by expandable arrows on the left: Core, Base, Purchased, and Forge. The Core section is currently expanded, showing four rows of data. The Match column contains a single 'M' character.

Update	Name	Location	Build Latest	Match	Build Local	Size
▶	Core			M		
▶	Base					
▶	Purchased					
▶	Forge					

SELECTING UPDATES

USAGE

1. Expand each of the four sections by clicking the arrow next to the row.
2. Sort the contents of each section by clicking the column header.
3. Sort multiple columns by holding the **ctrl** key and clicking the header.
4. Identify products that can be updated by sorting by "Match". Product versions that do not match are highlighted in yellow.
5. Allow the product to be updated by clicking the **Deny** button next to the product. (Note - The default is Deny. Any product you allow to update is remembered)
6. Once you have decided on the products to update, click the **Update** button. Pressing Updated will save your decisions. However, if you click Cancel, your decisions will not be saved.

A screenshot of the 'Selecting Updates' window. The table is expanded to show the 'Base' section. The 'Match' column header has a small upward arrow. The 'Match' column contains values like '==', '!=', and '!='. The 'Build Local' column contains values like '539', '259', '194', '431', '92', and '623'. The 'Deny' button is visible next to each product name.

Update	Name	Location	Build Latest	Match	Build Local
▼	Core				
Deny	FantasyGrounds	Application	539	==	539
Deny	FantasyGroundsUpdater	Application	259	==	259
▼	Base				
Deny	3.5E	Data	195	!=	194
Deny	5E	Data	444	!=	431
Deny	5E-addons	Vault	93	!=	92
Deny	CoreRPG	Data	629	!=	623
